

ANNOUNCEMENT

Version Release

The Formtek Peer Association Extension version 2.2 is now available for Alfresco 5.x.

The Formtek Peer Association Extension makes it possible to provide associations between documents in Alfresco. When displaying a document, the name of each associated document is provided with a link to it in the repository.

A typical use case is to associate a master or published document with the supporting documents contributing to its construction.

Current customers of the Formtek Peer Association Extension may download the software and documentation from their account at [Formtek Support](#).

The Formtek Peer Association Extension is one of several Formtek Extensions designed to increase the capabilities and productivity of your Alfresco implementation.
