

Formtek to assist NASA's Jet Propulsion Laboratory with migration from Xerox DocuShare to Alfresco Content Services

May 24, 2018

[Formtek, Inc.](#), a provider of document and content management software and services, and an Alfresco partner, has received a subcontract for professional services from the California Institute of Technology Jet Propulsion Laboratory (JPL).

JPL provides an Electronic Library Service which supports the requirement to archive, store, and retrieve mission critical program information. Today, the Electronic Library Service (ELS) platform utilizes a legacy enterprise content management software tool, customized by JPL, and provided by Xerox, called DocuShare. The current JPL ELS is comprised of approximately four hundred (400) libraries distributed amongst eleven (11) DocuShare instances, and manages five million files and approximately twenty (20) terabytes of data.

The JPL Electronic Library Services team is planning to migrate, over time, all of the data from the legacy DocuShare systems to a new system based on Alfresco Content Services (ACS). JPL has subcontracted with Formtek for information technology consulting services to assist the ELS team with the migration from to Alfresco.

Formtek services will include the analysis of the existing DocuShare systems, the migration requirements to Alfresco Content Services, migration design and development, technical support, and follow-on consulting assistance to JPL for further migration effort. The subcontract period of performance is expected to be May through October 2018.
